

μLearn

IDK

μLearn GECI is the student innovation and learning community of Government Engineering College Idukki. We empower students to learn emerging technologies, build meaningful projects, collaborate with industry, and create solutions that make a positive impact on society.

Build • Innovate • Impact •

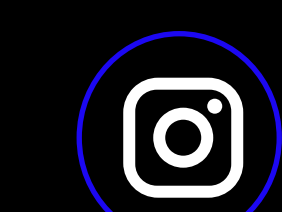

ABOUT US

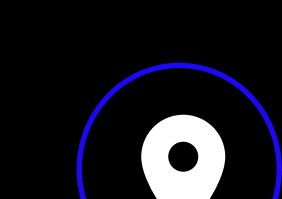

μLearn GECI is a student-driven learning community at Government Engineering College Idukki focused on peer learning, skill development, and real-world problem-solving. Through learning circles, bootcamps, and technology programs, we help students identify their strengths, explore emerging technologies, and build impactful projects.

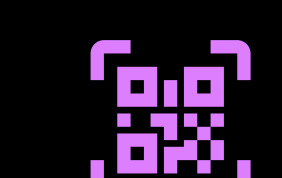

Our community has grown into one of the most active student groups on campus, fostering a culture of innovation, collaboration, and continuous learning among students from all departments.

Makeµ 2026

Makeµ is a 24-hour product-building hackathon organized by µLearn GECI. It challenges students to transform innovative ideas into functional solutions that address real-world problems.

Participants collaborate with peers, receive mentorship from alumni and industry professionals, and build products with meaningful impact. By the end of the event, each Teams present a working prototype, MVP, or product that demonstrates innovation, practicality, and real-world impact.
